The Bossier Parish School system is preparing to receive \$53,250 in educational funding. It's part of the Vantage Learning Keystone Partner Program in which Vantage Learning will award over half a million dollars in grants, endowments, and subsidies to 10 districts throughout the nation to install their signature MY Access! writing program.

MY Access! has a track record of helping students improve their writing proficiency and overall results on mandatory state exams.

The economic-stimulus package signed into law this past February by President Obama restored \$650 million in funding to the program, to be used over the next two school years.

The check will be presented Thursday, September 10th at 11:00 a.m. at Benton Middle School in Bossier City.
